*Christopher Rudd*  
**FROM:** Christopher Rudd, P.E., State Design Policy Engineer  
**TO:** Divisions of Engineering, Engineering Services, Field Districts, Division of Program Delivery, Division of P3  
**SUBJECT:** Erosion Control Outfall Location Guidance

The Erosion Control Outfall Location Guidance document has been published on the Manuals & Guides webpage under Roadway, Category: Construction Stormwater (Erosion Control).  
<http://www.dot.ga.gov/PS/DesignManuals/DesignGuides>

The purpose of this document is to aid designers in determining outfall locations in erosion control plans. This guidance has been developed in coordination with the Environmental Protection Division's Watershed Protection Branch. The Environmental Protection Division's Watershed Protection Branch has provided a No Review Guidance document which is published on the Design Related Resources page under Category: Engineering Services. One of the criteria which may cause a No Review letter to be received is if over 50% of the verified outfalls are not valid outfall locations.
